FDR Rev0 Figures 4-18 4-19.pdf

I didn't see you on the invite list but thought I'd tell you - :)
It will probably be a root canal -- it's 0430 and I'm already up and working
at home today --- going to vote at 0600 sharp!!

I have not heard from everyone, but a majority seem to be available, so let's
make this call on Wed 11/5 at 10:30-11:30am eastern, using the following call
in number: Not responsive

FYI: In addition to the figures mentioned below, attached are 2 figures from
a recent TSI report that I propose to send to CSTAG in response to their
request.

Subject: Fw: CSTAG-Lite Phase 1 prep call

On 11/5, one of my meetings got canceled, so I wondered if we could
have this 1 hr call on Wed 11/5 at 10:30-11:30am? If you are not available,
then it'll be Wed 11/5 at 3-4pm. Let me know.

Subject: CSTAG-Lite Phase 1 prep call

I'd like to ask for a 1 hour call with MPI/HQI/Battelle to
discuss the data presentations that CSTAG requested to start off Phase 1 of

the CSTAG-Lite process for the Early Action FFS. Please nominate one or two people from each firm to participate in this call who are familiar with existing data and data presentations (graphs, maps, etc...) that have been generated for this project. For example, I'd like to request someone from MPI who is familiar with the plots that are in the CSM-EMB, someone from HQI who is familiar with water quality data and sedflume analyses that have been plotted up and someone from Battelle who is familiar with fish/shellfish data that have been plotted.

I have culled out of the CSM-EMB the following figures that I think will satisfy the CSTAG's requests - for ease of reference during the call, I'd like everyone to have an electronic version of these figures - does everyone have an electronic version of the CSM-EMB?

Figures 14-1a & b, 14-2a & b, 14-3a1 & b3
Figures 5-1 & 5-3
Figures 11-7, 11-7a through i
Figures 22-1, 22-3, 22-5, 22-7, 22-8

I also picked out some figures from the HQI submission (letter dated 12/8/05 from Paul Anid to Bruce Fidler) attached to the 3/6/06 Draft Geochemical Evaluation (Step 2) report and looked at some figures from a Battelle submission (10/31/05 memo from Greg Durell, Erika Schaub to Bruce Fidler et al) attached to that same report. I assume everyone has that one.

Please designate people for the call and let me know if they are available for the 1 hour call during the following dates/times:

Mon 11/3 any time
Wed 11/5 after 3pm
Fri 11/7 any time

There is no preparation time needed for this call - please have the participants just bring their existing knowledge of the Passaic River.
